FasFil EZ® Auto

Paper Void Fill System

Responsible,
Fast and Easy
Void Fill Paper
Packaging

Sealed Air's innovative FasFil EZ® Auto paper void fill system delivers a perfect sustainable solution for small packing operations.

IMPROVED EFFICIENCY AND PERFORMANCE

It is specifically designed for customers who need a packaging system that improves performance, productivity and shipping quality.

FASTER AND EASIER OPERATION

The FasFil EZ® Auto system's simple footswitch operation produces continuous paper output with the press of a foot pedal and the built-in automatic cutting mechanism allows for easy release of paper.

MORE CHOICES AVAILABLE FOR BETTER RESULTS

A variety of options help you improve efficiency by saving time, energy and material:

- The FasFil EZ® Auto system is engineered to produce paper void-fill in both manual and programmed length modes. The easy to use digital length control dial delivers customised paper lengths with each press of the foot pedal.
- Small footprint and standard electrical requirements allow for flexible positioning. It can be mounted on a floor stand or table and adjusted to a desired height and angle.
- The FasFil EZ® Auto system can run with a choice of roll stock and fanfold paper configurations which are available in three different weights to ensure optimal protection.

EXCELLENT SUSTAINABILITY

FasFil EZ® Auto paper material is made from 100% recycled content, responsibly sourced and can be recycled with mixed paper. Additionally, the fibre is 100% renewable and all production waste is reclaimed.
